Light Engines

High density LED arrays have rapidly become one of our standard specialties. Whether your array consists of 2 LEDs or 2000 LEDs, First Level Inc. has the tools and experience to make your LED lighting product a success. We offer a wide variety of LED attach methods dependent on your products performance requirements, from conductive epoxies to gold tin eutectic processes. With high speed placement accuracies surpassing 10 micron, close spacing and tight tolerances are easily adhered to.
